Company Website:	http://bunniebling.store/
Position/Title:	software developer
No. of vacancy(ies):	3
Proposed Internship Duration:	60 days
Job Description & Requirements:	**Role and Responsibilities:** • Develop and implement new features on existing projects or initiate new projects based on customer requests. • Work closely with other developers, designers, and product managers to ideate and execute project plans effectively. • Ensure that all written code is clean, well-structured, and adheres to company standards, enhancing readability and maintainability. • Coordinate with the operations team to ensure efficient deployment and maintenance of software solutions. • Participate actively in code reviews and retrospectives to continuously improve the development process and outcomes. • Maintain a high standard of security and scalability in all software solutions to meet and exceed company standards. • Keep abreast of industry standards and advancements in web development to integrate best practices and innovative solutions into our processes. **Job Description** As a Software Developer at our dynamic company, you will be at the forefront of building and enhancing the software that powers our operations. You will engage in a collaborative environment with a team of talented developers and designers to bring innovative ideas to life. Your role will involve not only developing new features and starting projects from the ground up but also maintaining the robustness and efficiency of existing systems. **What You Will Gain:** • Advance your skills in cutting-edge technologies, including Large Language Model Technology, and stay updated with the latest industry trends in web development. • Work in a team-oriented environment that fosters personal growth through peer learning, code reviews, and retrospectives. • Play a crucial role in shaping the technological landscape of the company, directly impacting the operational success and innovation trajectory.
